III. The *Moon* will be eclipsed on Wednesday the 21st of August, at 11 minutes after 10 o'clock in the morning, invisible to us. In those parts of the world where it is visible, the *Moon* will be eclipsed 8 d. 41m. on its south limb.

IV. The last will be an eclipse of the *Sun* on Thursday the 5th day of September, beginning before Sunrise so that the going off will only be seen by us. The Digits eclipsed will be 8 deg. 41 min. on the N. limb.

The Planet *Venus* [♀] will be our evening Star from the beginning of the year to the 27th day of May, when she will be in conjunction with the *Sun*; from thence to the end of the year she will be our morning Star. The times of her rising and setting are inserted once or twice in each Calendar Page.

Venus is easily distinguished by her brightness, which exceeds all the other Planets. She constantly attends the *Sun* in an orbit between that of *Mercury* and the earth, and never departs from him above 47 degrees.

* *Candlemas*, is a feast in honor of the Purification of the Vir. Mary; it is borrowed from the practice of ancient christians, who used on that day abundance of lights in their churches and processions, in memory of our Saviour being on that day declared by good old Simeon, to be "a light to lighten the Gentiles."

BY an Act of Congress, approved February 16, 1792, an allowance is to be made on the exportation of Fish (in lieu of a drawback on the duties paid on salt in preserving the same) after the 10th of June 1792, as an equivalent, to each fishing vessel, qualified according to law, for carrying on the bank and other cod fishery who shall be employed therein at sea for the term of six months at least of the fishing season, for each ton of such vessel, according to her admeasurement, if of 20 and not exceeding 30 tons, *one and an half dollars*: if above 30 tons, *two and an half dollars*; of which allowance the eighth parts are to accrue to the owner, and the other seven eighths to be divided among the fishermen employed on such vessel, in such proportions as the fish they may have taken may bear to the whole quantity of fish taken on board such vessel during the season: *Provided*, that no allowance on any one vessel for one season shall not exceed 170 dollars.

An annual allowance is also to be made to the owner of every fishing boat of more than five and less than twenty tons, of the sum of *one dollar* upon every ton, to be counted for as part of the proceeds of the fares of such vessel, and to be divided among those interested therein. This allowance is to be made only to such vessels as have been actually employed at sea in the cod fishery for six months at least of the preceding season, and that such vessel shall have landed in the course of the preceding season not less than twelve quintals for every ton of her admeasurement: But if at any time within one year after payment of the allowance (which is to be on the last day of December annually) it shall appear that any fraud or deceit has been practised in obtaining the same, the boat or vessel upon which such allowance shall have been paid, if found within the district, is to be forfeited; otherwise the owner practising such fraud and deceit, is to forfeit and pay 100 dollars.

No ship or vessel is entitled to any allowance, unless the skipper shall, before he proceeds on the fishing voyage, make an agreement, in writing or print, with every fisherman employed therein, excepting apprentices & servants, which agreement is to be countersigned by the owner or agent of such fishing vessel.

The Act is to continue in force seven years.

EXPLANATION.

Look for the Dominical Letter for the Year, and underneath it stands the Day of the Week, which all the Figures in the Table shew to be such Days of the Month under which they stand. — In short whatever Day stands under the Dominical Letter, all the figures in the Table will be the same Day of the Week in each Month under which they stand respectively. But it must be observed that in a Leap Year there are two Dominical Letters, the first which serves for January and February only, and the second to the Year's End.

In the present Year 1793, it not being Leap Year, the Dominical Letter—Under which, for the Months of *September* and *December*, stands *Monday*, which shews that all the Figures in the Table are *Mondays* throughout the Year; by the knowledge of which the Date of the Day of the Month in the preceding or following Week may be easily known by reckoning from *Monday*.

Directions for sailing in & out of Boston Bay

THE Light House stands on a small Island at the entrance of the channel (Point Alderton & Nantasket heights being on the south) and is about 65 feet high to steer for it from Cape Cod, the course is W. N. W. when within one league of the Cape. From Cape Cod the Light House is about 16 leagues: From Cape Ann the Light House, the course is S. W. distant 10 leagues. After making the Light, and the wind fair, you may bring it to bear W. b. N. or W. N. W. and then run on it, till you come within two cables length of it. If the weather is so bad that a Pilot can't get off (as is sometimes the case) after running a-breast of it, so as to bring it to bear N. b. E. you may run W. by S. about a mile and an half, to Nantasket road, where there is anchorage from 7 to 5 fathoms in safety. If the wind is a-head you are obliged to work into Boston-bay, stand to the southward till you bring the Light to bear W. N. W. and to the northward till you bring it to bear W. S. W. when you come within one league of it, then you must not stand to the northward any further than to bring it to bear W. by N. & to the southward to bring it to bear W. N. W. You may anchor in the Bay with safety, if the wind is the shore. — There is a Cannon at this Light House, to be fired to answer any signal gun in thick weather.

There are two Lights at Cape Ann, on an Island called Thatcher's Island; they bear of each other, when in the S. S. W. a quarter S. and N. N. E. a quarter N. To go to the Londoner, or Thatcher's Island ledge, you may give the Light one league distance.

Fees of Pilotage for the Port of Boston.

Vessels drawing from 9 to 12 feet water, 3s. per foot.
— From 12 to 15 feet, 4s. — From 15 to 18 feet, 5s.
From 18 to 21 feet, 6s. — From 21 to 25 feet, 9s.

Pilots are to be under oath, that they will, from time to time, truly and faithfully perform the duties of a Pilot for the harbour or port of their assignment, according to their best skill and judgment. — And so to enter into bond for the due performance of their trust. — And if any shall be lost, cast away, or run aground, thro' the negligence or neglect of any Pilot, he is to pay the just value of the damage the vessel or cargo may sustain.

N. B. Whereas the establishment of Consuls is for the benefit of the trade of both countries, where they reside and where they come from, it is not improper to notify the American Merchants that it is useful and necessary to them to take a passport from the Consul, or from the Agent residing in the ports from where the vessels are to sail; because, in case of any accident happening to such vessels, that passport will be the best recommendation to the public functionary in the islands

The viiiith article of an act of the King's Council of State, of December 29 1787. mentions the following disposition:

“ His Majesty grants to the citizens and inhabitants of the United States all advantages which are enjoyed, or which may be hereafter enjoyed, by the most favoured nations, in his Colonies of America: His Majesty assures to the said citizens and inhabitants of the United States all the privileges and advantages which his own subjects enjoy, or shall enjoy, in Asia and in the seas leading thereto: *Provided* always, That their vessels shall have been fitted out and dispatched in some parts of the United States.”

For this last formality, the Consul only certifies the signature of the Justice of Peace before whom the Merchant made his affidavit.

It is likewise necessary that all papers sent to France or to any parts of the French dominions, which are authenticated by any civil or military American officers, should be presented to the Consul to certify the signature of the said officer or officers.

A Result mortifying to human Nature.

Upon 100 Persons born at the same time, there will remain at the end of 6 years, 64—at 16, 46—at 26, 26;—at 36, 16—at 46, 10—at 56, 6—at 66, 3—at 76, 1.

The following number of years a person may calculate to live; if he reaches 10 years, 44 more,

15 years,	41	If 50 years,	20	If 75 years,	6
20	38	55	17	80	4
25	35	60	14	85	3
30	32	65	11	90	2
40	26	70	8	95	—

More old men are found upon hills than in low lands. A man of a good constitution from nature, who has not been guilty of any excess, and to whom no uncommon accident happens, may expect to live from 90 to 100 years. The 9 years which are called *climacteric* (or the first 9 years) are more dangerous than the others; and they that arrive to reach 63 years, may expect to live to a great age. One quarter of the human life is past at 13 years;—One half at 28.—And three quarters at 50.

Scale of the Ages of the Animal Creation.

This Scale of the average of the duration of animal life is collected from Linnæus, Buffon, and others.

A Cat will live 10 years.	Swine, 25 years.
A Hare, 10	A Peacock, 25
A Goat, 8	A Horse from 20 to 30
An Ass, 30	A Pigeon, 8
A Dog from 10 to 20	A turtle Dove, 25
A Bull, 15	A Partridge, 25
An Ox, 20	A Raven, 100
Sheep, 10	An Eagle, 100

The Elephant, Lion, and Goose, also live to a great age; the accounts of which are tho't to be very extravagant.

Public Town Officers in Boston,

Necessary to be known by those who transact Business there
BOSTON is the Capital of the Commonwealth of Massachusetts. It is built upon a peninsula, of an irregular form, at the bottom of a large bay; the length, running about N. N. E. at the entrance from Roxbury, exclusive of the Neck leading therefrom (which is about one mile to the extremity at Winnisimmet ferry, is 1 mile, three quarters, and 199 yards. The breadth of the Town is various; near the entrance it is narrow, but passing thence it widens; and the greatest breadth is from Fort-Hill (near the centre) to the utmost point at the West part of the town, which is 1 mile and 139 yards. The breadth towards the northward diminishes, for from the Mill-pond on the west (thru' Cross-street) to the sea on the east, it is but 275 yards; however, it increases again to the northward, for from Charles's river bridge to Gov Hancock's wharf, it is upwards of 730 yards. The whole length of the Town, including the Neck which joins Boston to Roxbury (being 1 mile and 39 yards) is 2 miles, 3 quarters and 238 yards. The number of acres upon which the Town is built, has never been ascertained, but supposed to be about one thousand.

Certain Questions and Answers,

*Concerning the Mystery of MASONRY, taken from a very
 ancient Record, as the stile evidently manifests.*

WHAT may that be ?

A. It be the knowledge of nature, the understanding of the power that is therein; and its sundry operations; particularly the knowledge of reckonings, of rights and measures, and the true manner of forming all things for man's use, chiefly dwellings and buildings of all kinds, and other things that make good for man.

Q. Where did it begin ?

A. It did begin with the first men in the east, which was before the first man of the west; and coming westward, it hath brought with it, all comforts to the savage and comfortless.

Q. Who did bring it westerly ?

A. The Phenicians, being great merchants, came first from the east into Phenicia, for the conveniency of merchandizing, both E. & W. by the red & mediterranean seas.

Q. How came it to England ?

A. Pythagoras, a Grecian, journeyed for knowledge in Egypt, and Syria, and in every land where the Phenicians had planted masonry, and gaining entrance in all Lodges of masonry, he learned much and returned, and dwelt in Greece, growing & becoming a mighty Philosopher, and greatly renowned, and there he framed a great Lodge of masons, and made many Masons, some whereof died, and some journeyed in France, and made many Masons, where, in process of time, the Art passed to England.

Q. Doth Masons discover their Arts unto others ?

A. Pythagoras, when he journeyed to learn, was first taught, then taught; even so should all others be in right. Therefore, Masons have always in every time, from

Of Free Masonry continued.

time to time communicated to mankind such of their Secrets as generally might be useful, they have kept back such only as might be harmful if they came into evil hands, or such as might be beneficial without the teachings to be joined there-together within the Lodge, or such as do bind the brethren more strongly by the profit and convenience coming to the Fraternity therefrom.

Q. What Arts have the Masons taught Mankind?

A. The Arts of Agriculture, Architecture, Astronomy, Geometry, Numbers, Music, Poetry, Chymistry, Government and Religion.

Q. How cometh Masons more Teachers than other men?

A. They themselves have only the Art of finding new Arts, which Art the first Masons received from God; by which they find what Arts they please, and the true way of teaching the same. What other men do find out only by chance, and therefore but little, I imagine.

Q. What do Masons conceal?

A. They conceal the Art of finding new Arts, & that for their own profit and honour. They conceal the Art of keeping secrets, that so the world may conceal nothing from them. They conceal the Art of working miracles, and of prophecying things to come, that so the wicked may not use the same Arts to an evil end. They also conceal the Art of Changes, the Way of gaining the Faculty of Abrac, the knowledge of becoming Good and Perfect without the help of fear and hope, and the universal language of Masons.

Q. Will they teach me the same Arts?

A. You will be taught, if worthy and able to learn.

Q. Do all Masons know more than other men?

A. Not so. They on'y have Right and Opportunity more than other men to know, but many do fail in capacity, and many more do want industry, that is absolutely necessary for the gaining all knowledge.

Q. Are Masons better Men than others?

A. Some Masons are not so virtuous as some other Men, but in the most part they are better than they would be if they were not Masons.

Q. Do Masons love each other greatly as it is said?

A. Yes, verily; and that cannot be otherwise. Good Men and true, knowing each other to be such, always love the more as they be more good.
